LOGISTICS**

BENEFITS

FLAT-RATE NEXT DAY

In healthcare, predictability matters. Not just in patient care, but in logistics as well.

MedRX Logistics offers Flat-Rate Next Day Delivery Pricing, giving healthcare organizations a reliable and transparent way to manage shipping costs while ensuring critical medications and supplies arrive on time.

AUDIT READY

At MedRX Logistics, our Audit Support capabilities are designed to ensure full transparency and compliance throughout the delivery process.

Our 5-point barcode scanning system tracks every package at critical checkpoints, creating a clear chain of custody from pickup to delivery. Combined with comprehensive proof of delivery, including both digital and hard-copy signatures, pharmacies and healthcare providers have the documentation they need when it matters most.

RAPID REDELIVERY

In healthcare, **tomorrow isn't always good enough.**

At MedRX Logistics, we built our service around the realities pharmacies and patients face every day. That's why we offer **Rapid Redelivery.**

When a delivery attempt is missed, our team moves quickly to get medications back on the road and into the patient's hands as soon as possible.

And we do it without fuel surcharges or hidden fees.

HIPAA COMPLIANT

At MedRX Logistics, every delivery is handled with the highest standards of security, safety, and professionalism. Our operations are HIPAA and DOTD compliant, ensuring that sensitive medical shipments are transported with the care and confidentiality healthcare providers and patients expect.

And behind every delivery is a network of trusted, vetted drivers trained to handle healthcare logistics responsibly.

LIVE SUPPORT

Available M-F, 6:00 AM–7:00 PM with after-hours assistance.

At MedRX Logistics, we know that pharmacy delivery is more than getting prescriptions from point A to point B. It's about creating confidence at every step of the journey.

That's why live customer support for both pharmacy staff and patients is a core part of our service.

HOW IT WORKS

1

Pharmacy Pickup

Pickup times and volumes are coordinated directly with your pharmacy

Tracked Delivery

Real-time GPS, barcode scans, and photo proof with a 5-point barcode scanning system to ensure delivery

2

3

Patient Notification

SMS alerts keep patients informed at every step of the process

Verified Delivery

Audit-ready delivery records stored securely.

4

GROUND TRAFFIC CONTROL

MedRx Logistics provides dependable pharmacy delivery throughout the continental United States, helping pharmacies serve their patients with next-day scheduled service, customized batch and hot shot deliveries, and flexible after-hours options.

5-point barcode scanning system ensures full chain of custody tracking

Online customer portal with real-time tracking and proof of delivery archiving

Simple, predictable pricing structure for budgeting and cost control

Safe handling of sensitive prescriptions ensures product integrity upon arrival
